(January 5, 2004)
Price Adjustment for Quality of HMA
The first paragraph of Section 5-04.5(1)A is revised to read:

Statistical analysis of quality of gradation, asphalt content and volumetric properties will be performed based on Section 1-06.2 using the following price adjustment factors:

Table of Price Adjustment Factors		
Constituent		Factor "f"
VMA (Voids in mineral aggregate)		30
Va (Air Voids)		30
All aggregate passing 1/2"		2
All aggregate passing 3/8"		2
All aggregate passing U.S. No. 4		2
All aggregate passing U.S. No. 8		15
All aggregate passing U.S. No. 200		15
Asphalt Binder Content		30

The first two sentences of the second paragraph are revised to read:

A pay factor will be calculated for sieves listed as a control point for the class of HMA, for the asphalt binder and volumetric properties (VMA and Va).
